## PINNED UNDER AUTOMOBILE

Huntington Man and Wife Seriously Injured When Car Upset.

Were Coasting Down Steep Hill on a Charlotte Road When Something Unexpected Happened—Baby Escaped Unhurt.

An automobile accident in which the owner and driver were pinned under an overturned car and covered with thousands of pieces of glass from a broken windshield, a woman and at least one child, a man had his face scratched and a baby escaped unhurt, occurred at the foot of one of the steep hills between Alexander's Corners and Battist Corners in the town of Charlotte between 6 and 6:30 o'clock Sunday evening. The party was composed of Mr. and Mrs. Ernest Norton and infant child of Huntington, and a friend. At this distance from the scene the cause of the accident is in doubt, as stories differ. It is admitted that the car was going at a good rate, probably coasting down the hill. One story is to the effect that the car dropped into a hole in the road more than a foot deep, while another version is that a wheel ran over a fence and broke. It is certain that Mr. Norton lost control of the car, which turned completely over, pinning him under the steering wheel and throwing the others out.

Mr. and Mrs. Norton were taken to a nearby farm house and another automobile, following close behind, was rushed for the nearest physician, in the person of Dr. W. H. Varnes. It was at first thought that Mr. Norton was fatally injured but he was removed to his home in Huntington and it was believed Monday morning that he would recover. Mrs. Norton's injuries, although painful, are not dangerous.

## ORANGE HAWKWEED.

Prof. Hills of the Agricultural College Writes Concerning the Pest.

Professor Hills of the Agricultural Experiment Station writes as follows: Early in 1897 the Experiment Station published bulletin No. 55 upon the orange hawkweed or patenshew. The first words in this bulletin read as follows: "The orange hawkweed or patenshew is the worst weed known in certain portions of Vermont and threatens to invade other parts of the State unless precautions are taken." A map was included showing its distribution in the State, and it was pointed out therein that Caledonia and Bennington counties were comparatively free from the weed. The bulletin described the plant, indicated the way in which it spread, and means whereby it might be kept out, particularly how farmers and others might kill it out absolutely by vigilance. In order to be certain to get this information diffused over the State, and particularly in those regions not badly infested, a poster bulletin was prepared with a short description of the plant and means of combat. Upon this poster bulletin was a painting of the plant. This was sent to every post office in the State, and we believe hung up in every one. It was a striking thing and could not help attracting much attention. Bulletin No. 55 was sent in large numbers all over the State. Portions of it were copied in newspapers and a vigorous effort was made to warn people of its dangers. Now, standing comparatively few people we have reason to believe followed the instructions given and the plant is now thoroughly eradicated the whole State over. I submit that the station was alive to the situation and did what it could.

I note your query whether it is all conditions which are at fault. The trouble is really in the extremely effective method by which this plant spreads. Its great degree of adaptability to varying soil conditions, climate and altitude. It propagates itself readily by runners and by seeds and can only be controlled by constant culture where practicable and by heavy mowing when it occurs in patches only.

I may say finally that in the last 15 years the station has had a large amount of correspondence touching this weed, and has advised as to how to handle it.

## FIRE-PROOF STABLE.

H. C. Smith to Rebuild with Cement Blocks on Old Site.

H. C. Smith, the brewman, announces his intention of putting up a new stable to equal in size the building which was burned a few weeks ago, and Messrs. Brownell and Hawley, who own the barn on the south side of his livery stable, will also put a fire-proof building to replace the one which was partially destroyed in the same conflagration.

The contract for the Smith building will be taken by W. S. Swallow & Co. The structure will be of cement blocks and separate it from the Brownell and Hawley block will be a fire-proof wall. The new barn will be 14 by 54 feet in size, the same as the barn which was burned, but it will be of greater capacity, as 35 horses can be accommodated. Work will be begun this week and the contract will call for its completion in 60 days.

Mr. Smith has already ordered eight new lanterns to replace the ones destroyed by fire. In addition to a considerable amount of other paraphernalia, necessary to the conducting of a first class livery. The new barn will be two stories in height and will contain all modern improvements, such as an electric elevator, etc.

## STATE LIBRARY WORK.

Work by the State board of library commissioners from July, 1910, to July, 1911, has been in part as follows: Fifty-five applications for annual aid have been granted; that is, 50 libraries that have regular branches in district schools or in distant private houses, have each received \$25 worth of books from the State. Seven towns have established libraries, and have each received \$100 worth of books from the State. The demand for traveling libraries has been so great that the commission has added 15 of which 12 are school libraries, one a study club collection, and two general libraries. Eighty-nine stations had 117 libraries. The reports show great interest and good reading. The number of books added to this department during the year is almost 1,000.

The man to whom the "business opportunity" ads are a constant source of annoyance in the mental mood to succeed—and some of the ads, which appeal to him will be factors in his success.

## RAILROAD BUYS MUCH LAND

Property of Shepard & Morse Lumber Co. Transferred.

Company Reserves a Two Years' Lease of Portion Used for Mill Purposes—End of Main Street Included in Sale.

All of the property of the Shepard & Morse Lumber company north of King street, which includes the land on which are situated the mill and office and that land bordering the lake, has been sold to the Rutland Railroad company. Monday in the office of the city clerk a quit claim deed from the lumber company was filed, showing the transfer of the property.

The lumber company has reserved a two years' lease of that portion of the property used for mill purposes. It is understood that during the time of the lease the company will use all of the property not needed by the railroad company in erecting a new station. This means that the company's mill work will go on uninterrupted until the expiration of the lease.

The deed from the lumber company to the railroad company gives the Shepard & Morse people a \$10,000 mortgage on the property. In the grand list of 1911 the property was assessed at \$9,935. The sum paid by the railroad company for the property is not known. Talk about town places the price as high as \$20,000. The deed was signed by Horace H. Shepard, president and agent of the lumber company.

The deed gives to the railroad company all the rights of navigation and dockage, occupation and the use of the waters and basins adjoining said property. In this property is included what many persons term Main street, or the land where Main street would go if it were extended to the lake shore. Any rights the city may have to this property, it is said, will not be detracted from by the sale.

On the extreme north the property extends from the easterly boundary of Lake street to the property of James Lang on Battery street. The eastern boundary extends along the westerly side of Battery street to King street, with the exception of small properties owned by Hiram Gokey, Anna Nolan and Mary and Kate Denning. The southern boundary extends along the northerly side of King street from Battery to the lake, with the exception of property at the northwest corner of King and Battery streets, owned by Max L. and Louis Powell. The lake front portion extends from the property of the Champlain Transportation company to a point even with the northerly line of Main street, or where Main street would be if it extended to the water's edge.

If the proposed new station is erected across the Main street line it would cut an end forever, probably, to the action of extending that street to the lake. The Rutland railroad would then, as far as any one can see, have undisputed possession of that part of the lake front which is already provided with dockage facilities.

Sequestration proceedings have already been commenced by the railroad company to gain possession of the other properties mentioned.

F. Palacro of Barre has been taken to the State hospital at Waterbury. Palacro jumped into a passing automobile and began pounding a man on the head. The other occupants of the car, except a woman who was too frightened to move, jumped. They managed to get the man into a nearby house and physicians pronounced him insane. Illness is said to have unbalanced his mind.

TO WATCH THE WANT ADS is to be "in" when opportunity knocks.

Exposure to wet, dampness and cold, invariably results in a sudden chill, which if not attended to immediately will cause a cold. By making a few simple steps, Dr. Kalm's Liniment will give you warm water or milk, the whole system will be heated and the danger of cold avoided. Avoid substitutes, there is but one Pain-Killer, Perry Davis'. Price 25c, 50c, and 60c.

## CLUBBING LIST.

The Free Press and Other Periodicals at Low Rates to One Address.

The Weekly FREE PRESS can be obtained in combination with other leading periodicals at low rates. To prevent unnecessary correspondence we will state that after the subscription has begun notice of a change of address, or anything concerning the receipt of the other periodicals, should be sent directly to the office of that periodical.

The Weekly FREE PRESS any one of the following periodicals will be sent to any one address in the United States for one year at the prices annexed:

Subscribers may have more than one paper. Send a stamp for reply when asking about this, as we do all this work at no profit in order to accommodate our subscribers.

## SUICIDE IN HINESBURG

Despondent Woman Hung Herself with Piece of Heavy Twine.

Made Slip Noose on One End, Tied Other End to Cross Piece and Put Noose around Her Neck Then Kicked Chair Away.

Mrs. Clarence Lamson, a widow about 45 years of age, committed suicide at her home in Hinesburg village about 11:30 o'clock Sunday morning. She made a slip noose in one end of a piece of heavy twine, fastened the other end to a cross piece in the shed, put the noose around her neck, stood on a chair and then kicked the chair away, strangling to death. Other members of the family were at church at the time and her daughter found the body hanging on her return. Life was extinct. Mrs. Lamson's name before marriage was Lucy Irish and she was a native of Hinesburg. Mr. Lamson has been dead about two years. She is survived by two sons and two daughters. Frank of Shelburne, Eugene of this town, John of St. Albans and Maud of this town. Her act is attributed to despondency and she had made other attempts to end her life during the past few years. The funeral was held Tuesday afternoon.

## HORSE RIDES IN A BALLOON.

Most Spectacular Thriller of the Age With Barnum and Bailey Show.

The most spectacular thriller of the age will be seen in Burlington Friday, August 11, beneath the main exhibition tent of the Barnum and Bailey circus. Those who love horses will find their admiration for the animal increased tenfold when they witness the unprecedented feat of Jupiter, a magnificent Arabian stallion.

To begin with, Jupiter is the handsomest horse ever introduced in a circus ring. He is the king of equines and he looks the part. There is true majesty in his bearing. He is known as the "balloon horse" because he rides to the dome of the tent in a balloon and descends in a shower of fireworks. He is ridden by one of the most beautiful women who ever sat in a saddle. Instead of a basket, a platform is chained to the great gas bag. It is large enough to hold the animal. It has no railing. When everything is ready the balloon begins its ascent. The least nervousness on the part of Jupiter would mean death to him and his nervous rider.

On reaching the top there is a moment's pause. Then tongues of flame break out and there is a shower of fireworks. Jupiter and his rider descend in a shower of sparks. Fifty rockets, fastened to the platform, send sprays of fantastic fire in all directions. Through all this blazing torrent the descent is made.

No circus act of the past has scored anything like the success won by this magnificent horse. The performance is thrilling enough to rob people of the power to applaud. Once the horse and the rider reach the ground in safety, however, the approval and amazement of the audience are expressed in a storm of shouts and hand-clapping.

This circus has many more exciting feats than in which are displayed wonderful intelligence on the part of animals and the highest talents on the part of the show's various trainers. There is a troupe of Hungarian stallions that express the utter limits of the possible when they gallop. From the time they enter the arena until their act is finished, they remain standing on their hind feet. One of them plays the land of an inn. Another comes for food and a night's lodging. Mrs. Hazel has a dainty supper before him. This over, he lights a candle and shows his guest to a bed. Morning comes and the landlord rings the breakfast bell. The guest is lazy and refuses to get up. Mrs. Hazel takes him and tumbles him out of bed. They get into a row and a third horse, dressed as an officer, arrests the stormy boarder.

And an act is presented by Winston's seals. They ride horses, and while doing so, juggle fire brands and swords, toss their back and forth among themselves. This is the great act of its kind ever presented anywhere in the world. There is Charlie the First. All by himself he presents a life-riding act on one of the staves. He is the greatest performer of his kind on earth. No man lives who can accomplish his wonderful feats. Yet he is only a chimpanzee. There are dog acrobats, monkey acrobats, pig acrobats, and a new kind of performing elephants that play on organs, harps and horns. A bevy of beautiful dancing girls appear with the elephants and add greatly to the attractiveness and novelty of the act.

County Pomona Grange.

Will Meet at Jericho Center Next Tuesday With Mansfield Grange.

Chittenden County Pomona Grange No. 1, will meet with Mansfield Grange No. 44, at Jericho Center Tuesday, August 8. The program will be as follows:

10:30 a. m.—Meeting opens in fifth degree for transacting business and conferring fifth degree obligation.

11:30 a. m.—Fourth Degree meeting, with reports from Granges. It is expected State Master C. F. Smith will be prepared to answer questions in regard to degree work.

12:30—Dinner.

2:00 p. m.—Lecturer's hour. Open to the public. Singing, No. 152, Grange; invocation, Rev. George L. Story; roll call; singing, No. 160, Grange; question; music; address, Mrs. C. F. Smith, Morrisville; singing, No. 58, Grange.

Brown's River orchestra will furnish music. Traffic will be at the station to meet those arriving by train.

A wreck in which about 70 passengers had a lucky escape from injury and death happened on the Pittsford and Rutland railroad near Center Rutland Sunday morning when the freight work train, a locomotive and two cars, was derailed. The spreading of rails, caused by a heavy rain the night before, caused the trouble. Without warning the rails parted and the locomotive dropping to the ties ran a few feet and turned at right angles to the track. The two coaches followed it and toppled over on their sides, but not a person was injured.

John G. Shedd, president of the Marshall Field & Co. establishment in Chicago, is visiting in Rutland, where he was once a clerk in a dry goods store. He went to Chicago in 1872, entered the employ of Field, Leiter & Co., and then with his successor Marshall Field & Co. in which he was advanced steadily. And in 1906 he was elected to the head of the firm upon Marshall Field's death.

## LOSS ESTIMATED AT \$7,000

F. B. Calkins Intended to Take Out Insurance Tuesday.

Fire Licked Up 200 Tons of New Hay, Two Silos, Farm Implements and Wagons, Seven Calves and a New Barn.

The loss to Fayette B. Calkins, who lost 200 tons of hay, seven calves and other property when the big barn on the farm of Mrs. George B. Brown, burned early yesterday morning, is estimated at \$7,000. He had no insurance. The barn, owned by Mrs. Brown, was insured.

Because a barn owned by Mr. Calkins was burned a short time ago and because Oliver William Collins claims to have seen two men running from the direction of the barn directly after the fire was discovered, the story of incendiarism is given credence by some.

The reflection of the blaze in the farm house windows awoke the farm hands at two o'clock, and they immediately ran to the barn. In the meantime Oliver Collins had sent in an alarm to the fire department.

Because of the location of the barn, which was set close to several small buildings, the firemen had difficulty in confining the blaze to its origin. The barn was a mass of flames when the department arrived, and work was directed only to the nearby buildings.

William McCarty, the farm foreman, succeeded in saving one of the eight calves. The others were roasted alive.

The barn was a new one and had cement floors. Beside the hay, valued at over \$200, it contained two silos, farm implements, a double farm wagon and a hayrack.

Chief Niles expressed the opinion yesterday that the blaze might have been caused by spontaneous combustion. The farm hands, however, think otherwise.

Mr. Calkins on Monday finished placing the last load of hay in the barn. He had planned to get it insured Tuesday.

## UNDERTAKERS' MEETING.

Vermont Funeral Directors and Embalmers Coming to Burlington.

The 11th annual meeting of the Vermont Funeral Directors' and Embalmers' association will be held at the Hotel Vermont roof garden in this city August 22, 23 and 24. A cordial invitation is extended to all the funeral directors of the State to attend the meeting, whether members or not of the association. The executive committee has secured one of the foremost lecturers on embalming in the country in the person of Prof. C. F. Mondinger, Jr., of Brooklyn, N. Y. There will be good entertainment ending with an eight hour ride on Lake Champlain on the steamer Ticonderoga.

The board of examiners of embalmers will hold examinations at the Hotel Vermont, Wednesday afternoon, August 23, beginning at one o'clock. For information address George H. Gorham, M. D., secretary, Bellows Falls, Vt.

Following is the program for the undertakers' meeting: Tuesday, August 22, 8:00 p. m.—Opening of the convention. Vice-President J. H. Kelley, invocation, Rev. F. O. Winans, address of welcome, Hon. Robert Roberts, mayor of the city of Burlington, address of welcome for local undertakers, C. H. Hayden, response, A. E. Hall, annual address. Wednesday, August 23, 8:00 a. m.—Reading of minutes of last meeting, report of membership committee, appointment of committees, report of legislative committee, report of delegate to national convention, unfinished business, new business.

Wednesday, 9:00 a. m.—At the medical department of the University of Vermont, Prof. C. F. Mondinger will give a lecture and demonstration on an endeavor, to which only members of the association who so dues are paid in full will be admitted.

1:30 to 3:00 p. m.—Continuation of lecture and demonstration.

3:30 p. m.—Centennial field, base ball, undertakers vs. traveling men.

Wednesday, 8:00 p. m.—Reports of standing committees, (a) executive, (b) membership, (c) legislative, (d) special committees, (e) resolutions, (f) nominations, report of secretary, report of treasurer, election of officers and delegate to next national convention, (g) business communications, question box, unfinished business, installation of new officers, closing of business session.

Thursday, 8:00 a. m.—All members and their guests will assemble at the dock of the Champlain Transportation company at the foot of King street and embark on the steamer Ticonderoga for an eight hour ride on Lake Champlain, touching at Port Kent, Cliff Haven, Plattsburgh, Grand Island and St. Albans bay, returning at 4:45 p. m.

## JULY A HOT MONTH.

Maximum Temperature of 100 and Mean Four Degrees above Normal.

It will surprise no one to learn, from official sources, that the month which came to an end at midnight Monday was a hot one. The temperature went up to 100 degrees and the mean for the month was 72 degrees, four degrees above the normal July temperature. The maximum of 100 degrees was attained on the 3d and the lowest recorded was 48 degrees on the 28th. The greater daily range was 36 degrees on the 5th, and the least daily range was 6 degrees on the 25th. The precipitation amounted to 2.47 inches, the normal for the month being 3.75 inches. The prevailing wind was from the south, the total movement 6,306 miles, the average hourly velocity 4 miles, and the maximum velocity 24 miles per hour, from the south on the 15th. The month was made up of 11 clear, 15 partly cloudy and 6 cloudy days. Rain in quantity sufficient to measure fell on 12 days. Thunderstorms occurred on the 6th, 16th, 18th, 19th, 27th, 28th, 29th, 30th, 31st, and 1st, and a solar halo was noted on the 25th and fog on the 28th. These figures and data are taken from the monthly meteorological summary furnished by J. K. Hooper, forecaster at the local weather bureau station.

## STUNG.

Teacher Tommy do you know "How Duth the Little Busy Bee?" Tommy—No, I only know he doth it—To-day's Magazine.

By looking over today's real estate ads you will be able to forecast some of the assured real estate sales of the very near future.

## MANSFIELD TO CAMEL'S HUMP

Saturday Night Will See Trail between the Two Peaks.

First 25 Miles of Trail from Canada to the Massachusetts Line Projected by the Green Mountain Club of Vermont.

By Saturday night of this week a trail will have been blazed from the very top peak of Mt. Mansfield to the highest point on Camel's Hump, thus completing the first 25 miles of the mountain trail projected by the Green Mountain club—a trail that will lead from the Massachusetts line to Canada, and that will be about 200 miles in length.

James P. Taylor of Saxtons River, president and organizer of the club, is now engaged with a gang of men who are blazing a path from Mt. Mansfield to Bolton. The trail will be completed to Bolton by Friday morning and then a nearly straight line will be cut to the top of Camel's Hump. By Saturday night it will be possible for one to travel over the new trail from the top of this mountain to the highest point on Mt. Mansfield.

The trail from Bolton to Camel's Hump will greatly shorten the distance from Bolton to the mountain. Now people who visit the Hump go to Duxbury, which makes a round-about way to travel.

On Bolton mountain will be placed a better house, where the weary trail travelers may rest. Along the trail will be placed signs on which will appear an arrow and the letters G. M. C., the initials of the club.

Alfred C. P. Cowles, who is an enthusiastic member of the club, said yesterday that the trail would insure a safe place for pedestrians for years to come. There will be no danger from automobiles, although a big black bear may displace the way.

The Green Mountain club and the proposed trail has already aroused much interest both in Vermont and outside the State. The trail has appealed strongly to the crowded city dwellers and considerable space has been devoted to it in the editorial columns of New York papers.

## UNDER EVERGREEN ARCH.

Marriage Last Evening of Harmon P. Wetherbee and Miss Oona Parker.

Under an arch of evergreen, from which were suspended two white doves, and in a room decorated with goldenrod and green ribbon, Miss Oona Parker, daughter of Mrs. D. A. Parker, and Harmon P. Wetherbee, were married at 8:30 o'clock Tuesday evening at the home of the bride, 25 Elmwood avenue, by the Rev. C. J. Staples. The bride wore a gown of white messaline with train, hand embroidered and trimmed with pearl beads. She carried a bouquet of sweet peas. The bridesmaid, Miss Ida Smith, was attired in light blue silk and carried a bouquet of yellow daisies, tied with blue chiffon ribbon.

Previous to the wedding ceremony the wedding march from Wagner's "Lohengrin" was played by Miss Hazel Doten, and at the reception which followed vocal selections were rendered by Mrs. Edward J. Dupuy and Miss May Ritchie. At the reception refreshments were served.

Mr. and Mrs. Wetherbee received many wedding presents, including silverware, cut glass and jewelry. They left on the sleeper for a trip of two weeks.

Among those from out of the city who were present were Mrs. Charles Johnson and daughter of St. Johnsbury, Mrs. H. W. Rhodes of Passaic, N. J., Mrs. Harley Watkins of Rutland, Mr. and Mrs. E. Spaulding of Fletcher, Mrs. George Wells and Mrs. E. B. Shaw of St. Albans, Mr. and Mrs. E. B. Fish and Mrs. J.
